What is ECHO ???

ECHO , is a hands-free smart speaker that you control using your voice. It connects to Alexa – a cloud based voice service. With seven microphones, beam-forming technology, and noise cancellation, ECHO hears you from any direction-even in noisy environments or while playing music.

What is ALEXA ???

ALEXA , is a CLOUD BASED OPERATING SYSTEM , has over 15000 skills embedded in it and MORE getting added regularly .

“ALEXA is the BRAIN behind ECHO”

PRODUCT FEATURES :

- Echo Dot includes a built-in speaker. It can also connect to external speakers or headphones through Bluetooth or 3.5 mm stereo cable.
- Just ask for a song, artist, or genre from your favorite music services like Amazon Prime Music, Saavn, and Tune-In. Using multi-room music, you can even play music across multiple Echo devices at the same time.
- With seven microphones, beam-forming technology, and noise cancellation, Echo hears you from any direction- even in noisy environments or while playing music.
- Call or message anyone hands-free who also has an Echo device or the Alexa App. Using Drop In, you can quickly connect to other Echo devices in your home using just your voice.
- Controls lights, plugs, and more with compatible connected devices from Philips, Syska, TP-Link and Oakter.
- Alexa is always getting smarter and adding new features and skills. Just ask Alexa to order food from Zomato, request a ride from Ola, book a carpenter from UrbanClap, and more.
